Architectural Factors

Category/ Subcategory	Factor	Measures	Variability	Impact	Priority	Risk
	...					
...						

Note:

- Factor (relate to requirement under appropriate category/subcategory)
- Measures/Quality (if applicable)
- Variability (current flexibility and future evolution)
- Impact of factor (and its variability) on stakeholders, architecture, and other factors
- Priority for success (High, Medium, Low)
- Difficulty or risk (Critical, Significant, Ordinary)
